EDUCATION

Bennett University

Bachelor of Technology in Computer Science Engineering; CGPA: 8.86/10

India

Oct 2024 – Jul 2028

EXPERIENCE

Web3 Blockchain Developer Intern

Mar 2026 – Jul 2026

Digital South Trust

India

- Engineered backend modules and transaction workflows for Crypto Suraksha, a production Web3 platform.
- Designed and shipped REST APIs for a News Portal with validated request/response handling.
- Debugged production request failures and hardened error paths before release.
- Deployed shipped features through Git branch workflows and peer code review.
- Owned delivery end-to-end—requirements, implementation, testing, and production handoff.

PROJECTS

Krydo | TypeScript, Ethereum, ZKP, secp256k1 | [GitHub](#) | [Live](#)

Feb 2026 – Apr 2026

- Built privacy-preserving identity: prove eligibility without revealing values via 6 sigma-protocol ZK proofs over Pedersen commitments.
- Deployed 3 Ethereum contracts; on-chain credential hashes as source of truth, Firestore as the query layer.
- Validated the crypto path with 154 unit tests (51 on core primitives) and W3C Verifiable Credential export.

CivicSense | Solidity, Supabase, React, Gemini | [GitHub](#) | [Live](#)

Dec 2025 – Feb 2026

- Architected civic reporting with a 3-step on-chain lifecycle for a tamper-evident Sepolia audit trail.
- Hybrid storage: complaint payloads in Supabase; SHA-256 integrity hashes and status transitions on-chain.
- Automated Gemini triage for category, severity, and duplicate detection before human review.
- Developed citizen, admin, and org portals (12 pages) with Leaflet map reporting and on-chain TX confirmation.

BlockForge (LabEval) | Solidity, IPFS, React, Gemini | [GitHub](#) | [Live](#)

Sep 2025 – Jan 2026

- Designed modular assessment contracts with OpenZeppelin RBAC for admin, teacher, and student roles.
- Anchored IPFS CIDs on-chain, cutting on-chain storage cost by ~92%.
- Integrated Gemini-assisted grading for PDF/DOCX/TXT submissions to accelerate faculty review.
- Delivered a wallet-authenticated dApp with immutable grade records on Sepolia.

OPEN SOURCE CONTRIBUTIONS

wevm/viem — Merged PR [#4903](#)

- Fixed ESM module type generation for the generated .types package, improving TypeScript NodeNext ESM compatibility.

RESEARCH / PUBLICATIONS

- BlockForge: A Blockchain-Based Decentralized Platform for Transparent Academic Assessment** — Accepted, 4th International Conference on Networks and Cryptology (NetCrypt 2026); Conference Presentation, Oct 2026.

ACHIEVEMENTS

- Finalist, LNMHacks 8.0 (Top 30 / 150+ teams).
- Top 20, Tech Triad Hackathon, IIT Kharagpur (Kshitij 2026).
- Participant, AMD AI Reinforcement Learning Hackathon, IIT Delhi.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Solidity, Python, C++, SQL

Backend: Node.js, Express.js, REST APIs, Zod, JWT, EIP-4361 SIWE

Blockchain: Ethereum, Hardhat, Ethers.js, Zero-Knowledge Proofs, Pedersen Commitments, secp256k1, Verifiable Credentials, IPFS, Sepolia

Frontend: React, Vite, Tailwind CSS, shadcn/ui, TanStack Query

Databases: PostgreSQL (Supabase), Firestore

Developer Tools: Git, GitHub Actions, Vitest

Core CS: Data Structures & Algorithms, Cryptography, Distributed Systems
